

ABOUT THE MME

The Morris Muse Experiment (The MME) is three separate stories about the same character, Morris Muse, at three different stages of his life. There's nine-year old Li'l Mo, 16-year old Mo' Muse, and 39-year old Morris Muse.

Using simple narratives The MME teaches children, teens and adults how to view the world through Biblical lenses. Each story connects the dots of life back to God. It is an opportunity for believers to continue to grow in this discipline while offering insight to the unbeliever as to how Christians use the Bible to view and process the world. The MME is a tool to bring understanding and open up pathways of communication and discussion.

ABOUT LI'L MO

Nine-year old Li'l Mo can't understand why his parents and grandfather are always telling him to think. Think about this. Think about that. Above all, think like Jesus. But, how much thinking can a kid do? Don't they know that too much thinking takes all of the fun out of life. Or, does it?

START THE CONVERSATION

KEEP THE CONVERSATION GOING

What do you think about thinking? Have you thought much about it? Most of us don't. It's just something we do naturally until something happens to make us stop and thinking about thinking. Like this comic right now.

Have you ever wondered why we think? God tells us why in His Word. In Genesis 1:27 it says that God created man in his own image, male and female. Let's look at two things God is telling us in this passage. Number one, He created us. Number two, He created us in His image. From this we can conclude that we thinking because God thinks. Our God, the Creator of the heavens, earth, and all life, designed us to think about everything we experience in our world.

So, how exactly did God create us to think? Well, He created us with a mind and a

brain. Did you know that the mind and the brain are two different things that work together? The mind is the non-physical, spiritual part of us that thinks, feels and chooses. The brain is the physical part of us that stores our memories and controls our bodies by sending signals through our nervous system telling every part of us what to do.

Definition of
think
To use one's mind
to form and connect
ideas.

Recent scientific research shows that our thoughts are so powerful that they can actually change our brains which can change our bodies! That's amazing and a whole lot to think about! It's no wonder God spends so much time in His Word talking to His people about their thoughts.

So, with all of that in mind (no pun intended), do you think it's possible to think too much?

... AND GOING ...

Questions to Ponder:

Have you ever thought about your thoughts? If yes, what have you thought about them?

What do you think about the most?

How do you think your thoughts can affect your body?

Do you think God wants you to think about Him more than anything else?
